

Corruption In The Department

Of Energy

[Green Subsidies under Obama](#). The *Washington Post* found that “Obama’s green-technology program was infused with politics at every level.” The \$535 million loan guarantee for the failed Solyndra is a prime example. The Department of Energy approved the loan after pressure from the White House. A main Solyndra investor was a billionaire Obama fundraiser. The *New York Times* found that Solyndra “spent nearly \$1.8 million on Washington lobbyists, employing six firms with ties to members of Congress and officials of the Obama White House.”

[Crony Capitalism](#) has existed for a long time. So energy companies have been able to get government officials to pass legislation that helps them make more money. So they get tax breaks, loopholes, subsidies while the rest of the economy suffers and they make huge profits (and in some cases, record breaking profits).

Clearly the Department of Energy has failed at it's job.
